

MERAKI HRM

Meraki Hrm is a simple web app to manage your company's HR department. This app was being built using React JS, Node JS, and Mongo DB. Make sure you are aware of it. Installation instructions have been included in the project folder. This project includes frontend folder master and backend master.

Get Started

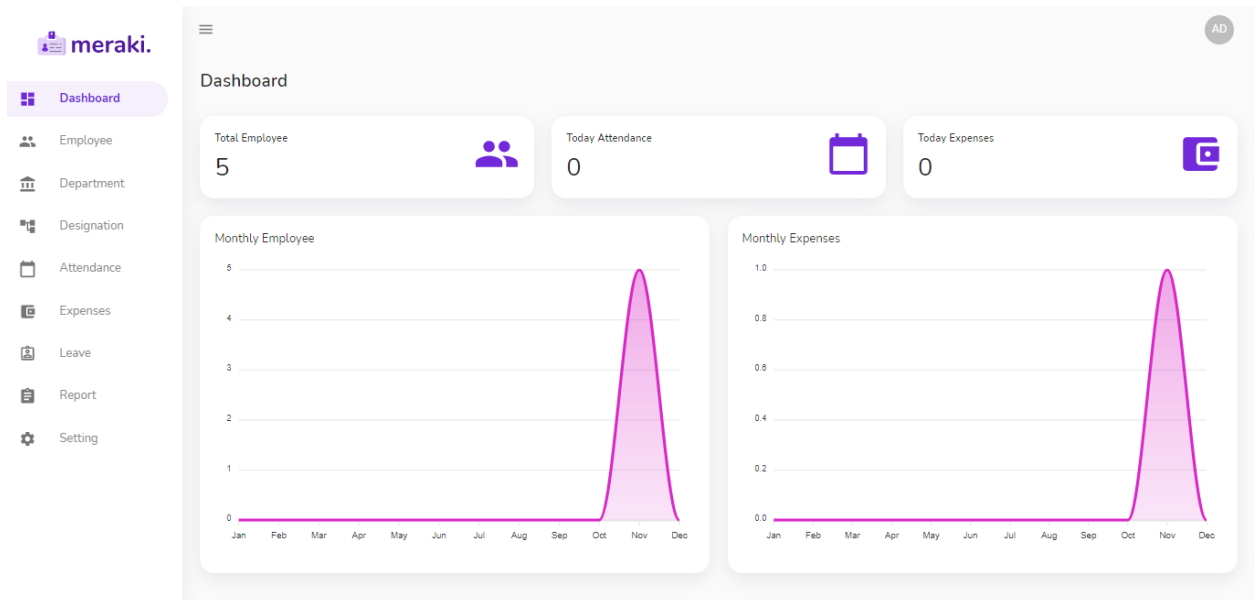

- Employee and User Management
- Department and Designation Management
- Attendance and Leaving Management
- Company Setting

A. Login Page

Role: Admin, Human Resource, Department Manager, Staff

B. Dashboard

C. Employee Manage

The Employee Manage section allows for searching, filtering, and viewing a list of employees. It includes a search bar, filter dropdowns for Role, Status, Department, and Designation, and a table of employee records.

Search: Search by name or email

Sort: Name

| Employee | Email | Role | Department | Designation | Status | Option |
